LAMSON CARRIER SERVICE

Pneumatic Tube Systems
For centralizing Cash and Saleslips in retail stores and for carrying letters, requisitions, orders and other papers from place to place in factories, warehouses, business offices, etc. Pneumatic Tubes Centralize Executive Control.

Belt and Selective Conveyors
For speeding up the delivery of packages in department stores and for use wherever a Conveyor is required for packages of moderate size. Selective Conveyors may be designed to pick up or discharge a load at any predetermined point.

Gravity Conveyors
For handling goods in barrels, boxes, packing cases, etc. This type of Conveyor carries packages having one flat surface with no consumption of power. Gravity Conveyors are flexible — they may be run around corners, between floors— practically wherever desired.

Light Elevators
For use in stores, restaurants, factories, warehouses, etc., wherever light loads are carried. These elevators are often furnished with selective mechanisms for stopping the car, or discharging the load at different floors.
